Knit & Woven

ABOUT COMPANY

Production has already been started in 1986 with only six knitting machines. Today, thanks to our sustained investments in machinery over the years, our company has become a colossal integrated plant that consists of five separate factories that specialize in knitting, dyeing, printing, digital printing, and yarn dyeing. Our innovative solutions are; Special Finishes; such as fluorine-free water repellent, moisture management, antibacterial and cooling finish, UV protection, silk touch, etc... Performance fabrics; natural wicking, fast drying, cooling and freshening with Direlease technology. Natural Dyed Bio Fabrics; allow us to design clothes with plants - enabling our skin to contact only with nature itself.

ABOUT COMPANY

Saka Holding was established as a family company in 1988. Having equipped his business with the latest technology, Mr. Ramazan Saka, Chairman of the Board of Directors of Saka Holding, has reached the capacity of integrated production from fiber to fabric, and has put into operation knitting, fabric dyeing, finishing and printing facilities respectively. Within this process, it is growing by strengthening its sales network and leading position in domestic and foreign markets day by day. Thanks to their determination and dedication in a very short time in the factory they established, they have managed to carry their success to the highest level together with the Chairman of the Board of Directors and their teammates. It contributes to the country's economy by carrying out all kinds of knitting, dyeing and printing processes with its monthly production capacity of 1800 tons. Over time, it has expanded the range of products it added to its production line.

Denim & Knit & Woven

ABOUT COMPANY

Established in 1987, Alan Moda has specialized in manufacturing and exporting jackets and outdoor gear. In 2007, the company expanded its product line to include denim. A year ago, it further diversified by adding a knitting group, offering knitted collections and production services. Alan Moda boasts in-house production with versatile cell production lines capable of handling denim, non-denim, soft woven, and knitted jersey products. The company emphasizes hand craftsmanship and specialized workmanship in its services. Notably, Alan Moda excels in executing various processes like washing, printing, embroidery, and handwork on products with precision and quality. The company prides itself on its adaptability and commitment to innovation, believing there's no product beyond its manufacturing capabilities.

ABOUT COMPANY

Panel is a company, founded in 1986 and we took over the company in year 2021, as 2nd. Generation. It is a company, producing for high quality ladies wear brands from Europe and USA, and after moving to our new place in 2023, we are fully integrated, making production from cutting to packing, including pattern making. We are 90 people as Panel and sister company Pink, having both blue collar and white collar under our roof. The goods arrive to our place as fabric and leave here as garments. Since 2022, we are also able to make production as GRS certified. Our Sedex and BSCI certifications will be renewed in 1-2 months as well, in the new address. Thanks to our customers, we are also quite advanced, producing garments with sustainable fabrics, using sustainable yarns.
